

SENTEK DRILL & DROP PROBES

Sentek's Drill & Drop Probes are the ultimate in automatic upload and **continuous soil monitoring**.

The unique, slim, tapered design enables minimum soil disturbance and no air gaps. The probe measures a 90cm soil profile in 10cm slices. Reading and upload frequency can be set to 'almost real time'.

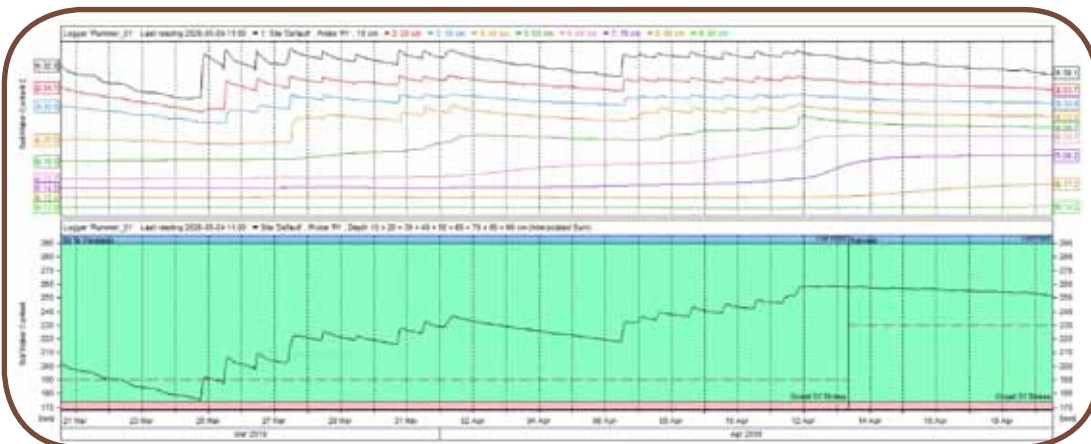

ADVANTAGES

- Up-to-date data always available.
- Soil moisture and soil temperature readings at each sensor, every 10cm down the soil profile.
- Easy-to-understand data displayed on IrriMAX Live, the most comprehensive soil-probe software available.
- Easy-to-see effects of crop water use, onset of stress, irrigation, rainfall, and depth of root activity.

OPTIONAL EXTRAS

- Long-life lithium battery or solar/rechargeable battery power options.
- TriSCAN sensors – nutrient salt concentration.
- Multi DTU allows addition of other sensors – rain gauge, temperature, wind and flow.
- Local (within 3km) weather forecast.
